

Toxic And Combustible Gas Detectors

Explosimeter

- 0-100% LEL of preset gas
- long reserve time
- high reliability
- compact design
- LCD display

Explosimeter / catharometer

- scale: 0-100% LEL
- 0-100% volume
- long reserve time
- high reliability
- compact design
- LCD display

Explosimeter

- distinguishes between CH4 and other explosive gases
- text display of type of gas detected and concentrations
- long reserve time
- high reliability
- compact design
- LCD display

Explosimeter

- 0-100% LEL
- distinguishes between CH4 and other explosive gases
- long reserve time
- high reliability
- compact design
- LCD display

CO2 detector

- scale: 0-5%
- shock resistant Infrared cell
- long lifetime
- long reserve time
- compact design
- LCD display

Oxygenometers and toximeters

- 2 instant alarm thresholds
- STEL-TWA alarm
- compact and light
- many gases detected: O2, CO, H2S, NO, NO2, NH3, Cl2, HCl, HCN, O3, H2, other gases on request
- LCD display

Multi Gas Detector

- detects 5 gases simultaneously
- safe to use in 0 zone
- graphic display
- Infrared port
- data storage
- smart, interchangeable sensor blocks
- explosive gases (universal explosimeter)
- catharometer
- O₂, CO, H₂S, SO₂, NO, NO₂, HCl, HCN, NH₃, H₂, ETO, AsH₃, PH₃, SiH₄, COCl₂, O₃, HF ClO₂, CO₂, others on request

Multi Gas Detector

- new work site monitor with radio link
- available during 2004
